

Where it all starts

To limit global warming to 1.5 °C, we need fast and drastic CO₂ emissions reductions - and we also need to actively remove CO₂ from the air. The IPCC and SBTi recognize that carbon removal technologies such as direct air capture & storage (DAC+S) are required to reach global net zero.

Our vision is to inspire 1 billion people to remove carbon dioxide from the air.

Climeworks' solution

Permanent
CO₂ is stored for thousands of years

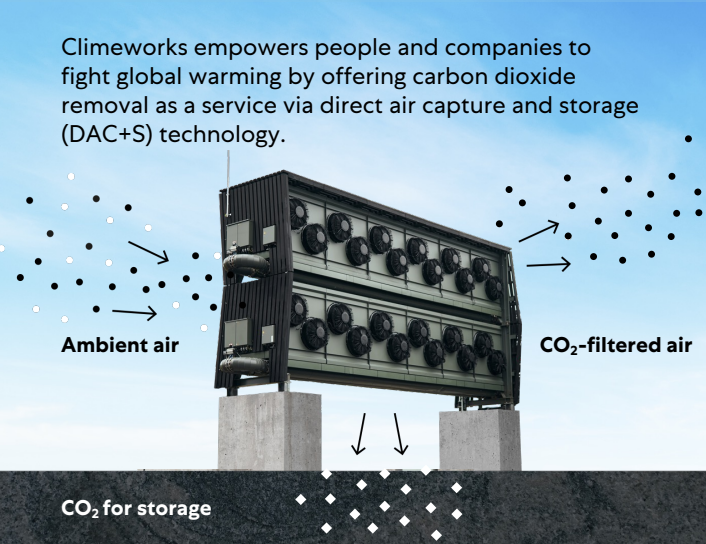

Additional
We remove net CO₂ from the atmosphere

Certified
Precisely measured based on 3rd party validated methodology

Scalable
Low land footprint and modular technology design

Leaders are taking Climeworks action

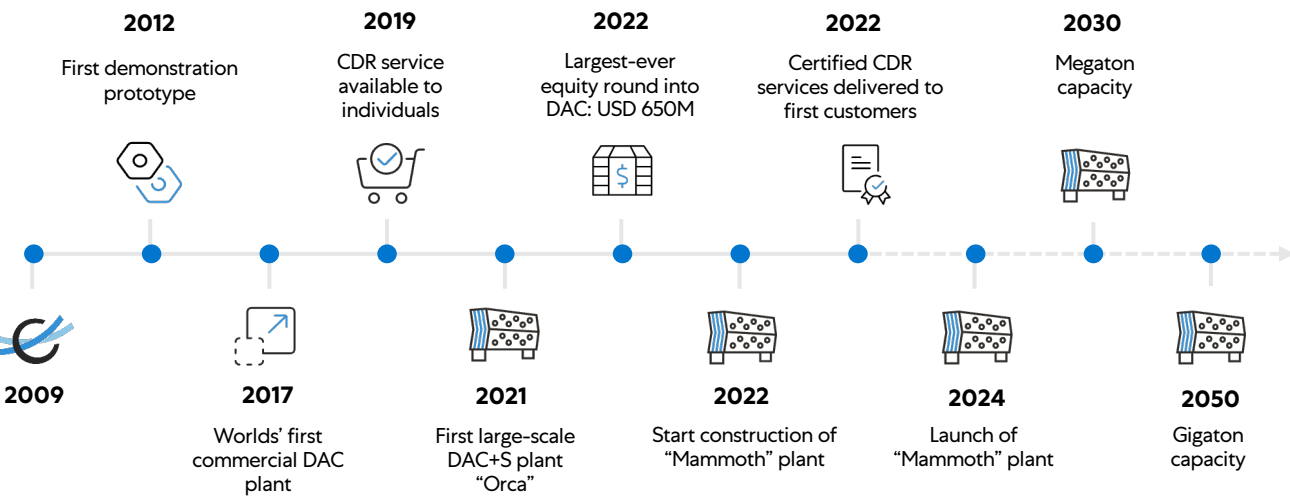

Our journey to gigaton scale

Climeworks in numbers
